

Phenological Scoring Guide for *Calochortus albus*

Erin Grady

BUD

This specimen may have more inside petals visible, however it is still a bud because it is almond-shaped and not an open flower yet.

OPEN FLOWER

Although this is still slightly almond-shaped, this is an open flower because the majority of the inner petals are visible.

IMMATURE FRUIT

In these two images, you can see the fruit starting to form from the flower. The seed pods are narrow and elongated.

MATURE FRUIT
